The Rainigh News of the 20 inst s untains a let-ter from a Baid Montelan correspondent ascrib-ing the recent excitquate to the servest prayers of Possy B. Owesahy, who, having walshy tried to get up a veriful similar the nature walshy tried to the Almight to make the companion of the con-tain laboration of the contained with the mouta-tain laboration to bis heels without waiting to point a moral.

Pose: B. Owemshy-may his tribe increased lives, or did live while nature was at pense, Near colf Baid Mountair seammit in the cloud. Remothed afar from city din and crowds. Peaceful he plowed his west polate patch, in passe prepared his setting heas to hatch; in passe princip did daily to increase his store And, peaceful still, wrought hard to make more.

Fact by his humble vine-clad cable stood— Or stands, unless Old Bald in hungry mood. Has awallowed it—a country school hoties rude Builded of fore and daubed with plastic olay, To kere 'it winter's wind and summer's rail

Their A H che' and 'two times naught is naught;' On Suntays here good Coasy aerments read, And calved down acrows on the sincer's head, And colved down acrows on the sincer's head, And often preached with orthodoxy's roar Sunta eropiure takes as so in were beard before. How Ansansa and nie greedy bride.
Thousing a trade in turpeature had lied;
Now on the instant: 'both were lightnin 'struck
How Ansansa hid was abanterened by a span
'Canse that he teached dutillin' onto man;'
How 'Enjan for his crucibless was gored
its Eliud, the left-handed, with a sword;
'its iedlin' holy secrets to his wife;
'its iedlin' holy secrets to his wife;
'And how in every age, it every elime.
The Lord's gad prode the shake every time.

Baid Mnuntain's sons were beedless, and also ber daughters led the preacher's warning pass one day there came a Raisigh anvibe who spok And said, "I've beern Old Baid's begun t smoke," smake,"
Then Posev girded up his loins and cried
Unto the people on the mountain side;
And in the school hense flocked they by th

To bear the warning they'd oft heard before.
And heedless still the assuing neighbors heard

But "Lord, send down thy lightnin', then But "Lord, send down my inguine", use, he prayed;
he prayed;
"Let bese here weeked hearts be sore dismayed;
Let Baily" so week bile and bust, ch. Lord!
And shake us np right sausrt!"—and at the word.
There was a sudden auberranean quake.
That made the rafters of the school house shake;
And from below there came a dreadful sound.
As of storm demons battling underground.

One shreik, one yell of sinners reat the air, And firth they runned in terror and daspair; Forth to the road and down the roaky deal Fled panting priest and position, pell-imedi. And when they passed the dwellers on the plain Lei Poery Owenby led the ficing train.

WHAT BECOMES OF EDITORS?

What becomes of the editors? That's what we'd like to know: They do a bean of good on earth, And to heaven they ought to go. Sut something seems to tell us. They're a peculi rest.

We've been thinking the question over, And it troubles it a heap; it it comes to us in the daytime. And with dreams disturbs our sleep. And the more we can the question The deeper it exams to get, And brings us so this conclusion. They'll "be left out in the wet."

Now, reason to yourself a moment: Wend that to to let them in? Wouldn't they go to inheretweining And discussing everything? Wouldn't they have two parties. And a hobby, too, to pet? That thing would never do up there-Tray! Ibe a 'left out is the wet.'?

It's very well to smile, sir, And say, "you'r head ain"t level," But did you ever know as editor That tidn't kees a "devil" You won't suppose for a moment That he in their could get, And box spilling "soyp";"— They'll be "left out in the wet."

inserves far more nave, in the continuous anthematical cubic-inch programme. Sature does not dole out pure air by the cubic-inch, but if unrestrained, supplies every living thing abundantly. She scorns every attempt to measure it, and if we adopt her method of warning, it will be about as easy to supply a hundred cubic feet of cold invigorating air per minute to every individual, as we now use to every war of the nor in the end would have been, if John in his endeavors to be respectful and sympa about a flock of geese, comes to us from Butler county, California. On the now on many which will be put on the market use.

A very durious little story, all about a flock of geese, comes to us from Butler county, California. On the now on many which will be put on the mich while be now on many which will be now on many to every life and the now on many which will be now on many to the now on many to expect the now on many to expect the now on many to expect the now on many the interest the now on many the interest to get again.

I do not know what the end which will be now on many the interest the now on many the interest the now on many the interest the now on many the interest to get again.

I do not know what the end which wil money in getting up patterns and taking out patents for warming con-trivances. But I have done with trivances. But I have done with them. We have been running air-heating to such extremes that I have become perfectly disgusted with it. If we inhale air at the same temperbreathing purposes by overheating it—she leaves such miserable busi-ness to the managers and warmers of railroad cars, asylums, bospitals, and, not unfrequently, our bomes.—
[L W. Leeds, Sanitarian for May.

MY DEAF WIFE AND MY AUNT.

prompted the wickedness that I prompted the wickedness that I A rooster which has four feet and is perpetrated towards my wife and wings is attracting the attention of Sac will be a supplementation of the sacratic state.

my dear," said I to my wife on the day before my aust's arrival, "you know aunt Mary is coming to-morrow; well, I forgot to mention a rather annoying circumstance in regard to her. She is very deaf; and, although she can hear my voice you will be obliged to speak ex.

""must development relation.

"Any dear," said I to my wife on the form annular of food.

The Richmond Conservator says that feed for stock is nearly all caisen up, and corn and hay is getting extremely scarce.

Owing to the continued heavy rains, the Ray county farmers are alraid that they will be unable to get in a full crop of corn. you will be obliged to speak ex-tremely loud in order to be beard.

loves a joke about as well as any person I know, and told him to be in the house at 7 p. m. on the follow-

before. She is very deaf; and, atthough she can hear my voice, to which she is accustomed, in its ordinary tones, yet you will be obliged to speak extremely loud in order to be heard. I am sorry for the cord.

Rais County Record: Feed is distress-

Aunt Mary in the goodness of her heart, protested that she rather liked speaking loud, and that to do so afforded her great pleasure.

The carriage drove me. The control of record.

Ralls County Record: Feed is distressingly scarce throughout the county, and many cattle are dying. One farmer near Madisonville, we understand, has lost nearly twenty head of stock within the past two weeks.

The carriage drove me.

Brackee county, Ky. He is known to be replied that it would be still more bills split into fragments. Many of over one hundred years old, and himself difficult to gather up and destroy all them had the feathers of their backs

States. In fact, if we except the somewhat apocryphal Bezantian who claims to be done when the carrier, and takes it to the bouse. When the carrier apportyphal Bezantian who claims to be the gate for his charge; when he is late, set man in the world.

FLOUR, MEAL AND BRAN FOR SALE CHEAP, portion of this county. The thunder was heard twenty miles distant.

WE DO NOT intend to be undersold. Give us a call and we guarantee satisfaction. All social delivered to any part of the olig free.

STOCK, FIELD AND FARM

for the first time since my marriage; and I don't know what evil genius prompted the wickedness that I bexter.

Mr. Robert Bonner last week rejected an offer of \$100,000 in gold for his horse prompted the wickedness that

Sixty-two head of Berkshire pigs from It will be rather inconvenient, but I know that you will do everything in day for \$4.75 per hundred.

your power to make her stay with a agreeable."

Mrs. — announced her determination to make herself heard, if in her power.

I then went to John N—, who loves a joke about as well as any that the peaches generally are killed.

Roy 34 75 per hundred.

Corn is worth \$2 50 per barrel, and grass very backward, to the annoyance of Saline farmers, who expected to have had their cattle grazing by this time.

Paris Mercury: We understand that the apple, cherry and pear buds in this section are all right yet, but we are sorry to learn that the peaches generally are killed.

Peculiarities of a calf lately born in Luc-low, Vt. : Two heads, six legs-four for ward ones-and two hind ones-and two tails. It is no more, but has been stuffed.

"My dear aunt, there is one rather annoying infirmity that Annie (my wife) has which I forgot to mention before. She is very deaf; and,

The carriage drove up; on the steps was my wife; in the window was John N—, with a face utterly solemn as if he had buried all his relatives that afternoon.

Mr. Daniel Root, of Saline county, has sow less than two years old, which (according to the Saline County Democrat), it was John N—, with a face utterly seven days less than a year, gave birth it free litters, to thirty-six pigs, all but four of which are thriving.

solemn as if he had buried all his relatives that afternoon.

"I am delighted to see you." shrieked my wife, and the policeman on the opposite sidewalk started, and my aunt nearly fell down the steps.

"Kiss me my dear," bawled out my aunt; and the windows shook as if with fever and ague. I looked at the window; John had disappeared. Human nature could stand it no longer. I poked my head into the carriage, and went into strong convulsions.

When I entered the parlor, my wife was helping aunt Mary to take off her hat and cape, and there sat John with his face buried in his handkerchief.

Suddenly—"Did you have a pleasant Journey!" went off my wife's voice like a pistol, and John nearly jumped to his feet.

"Rather dusty!" was the response in a warwhoop; and the conversation continued.

The neighbors for blocks around must have heard it. When I was bridged to the first startle, averaging 1620 pounds, and four years old and were all three and four years old and were all

in a warwhoop; and the conversation continued.

The neighbors for blocks around must have heard it. When I was finite the neighbors for blocks around must have heard it. When I was finite the neighbors of the building I had be in their could get.

And be a yeiling "copy" "
Ther'il be "left out in the wet."

Ther'il be "left out in the wet."

Ther'il be "left out in the wet."

Ther has "pulled his wessel" yet?

They're not going to do it there.

Ther'il stay "out in the wet."

PRINCIPLES OF VENTILATION.

Ventilation is based upon the movements of air at different temperatures, but we cannot get rid of foul air, or supply fresh air in the same manner as we would free a house of full water or supply it with that which is pure by exact measures, allowing just so many cubic inches for each occupant.

In a warwhoop; and the conversation. The neighbors for blocks around must have heard it. When I was find the conversation. When I was find the third story of the building I wis there. Ther'il stay "out in the wet."

In the course of the evening my aunt took occasion to speak to me "How loud your wife talks!"

I told be that ail deaf persons talked loudly, and that my wife being used to it, was not affected by the exertion; and that she was getting along very nicely with her.

Presently my wife said softly:

"Yes," said I, "all deaf persons do. You are getting along finely with her; for she hears every word.

Elated at their success in being inches for each occupant.

inches for each occupant.

The conditions are entrely different. In studying the movements of the air, if we would compare them with the movements of water, we must imagine ourselves at the bottom of the orean with the ground duderneath us heated as a fire would beat the bottom of a pot. By watching the motion of the water in a glass globe with a fire under it we can form some idea of the constant and immense agitation of the external atmosphere.

Inaccurate, unscientific, and even repuisive as the idea may be to the mathematical mind of the architect, that we should depend in a great measured for the country of the west of the constant when the mathematical mind of the architect, that we should depend in a great measured for the country of the west of the constant of the country of the constant and immense agitation of the external atmosphere.

Inaccurate, unscientific, and even repuisive as the idea may be to the mathematical mind of the architect, that we should depend in a great masked in a great mask

Inaccurate, unscientific, and even repulsive as the idea may be to the mathematical mind of the architect, that we should depend in a great messure upon the mere agitation or the mixing up of the fresh and foul air, for our chances of getting pure air, I think, notwithstanding, this is just what we have to submit to. This is what nature teaches us, and although we may be to acertain extent artificial beings, and live in artificial beings, and in trying to work in a more precise and accurate manner than Old Madam Nature does, has about worn out my patience in that direction; and I confess that her hurly-burly way of mixing the oxygen, introgen, hydrogen and carbonius acid, and all other gases together in one grand mass, and seatioring them around promise cuously, is butter than any arrangement I have ever been able to devise. The more we study the subject the more evident it becomes that agitation is the natural method of ventilation—it is Nature's great purifier.

Now, if we accept agitation as the true principle of ventilation, we find ourselves far more likely to get our share of our pure airly it than by the cubic-inch, but if unrestrained, supplies every living thing abundantly. She scortas every attampt, the mathematical cubic-inch programme.

Nature does not dole out pure air by the cubic-inch, but if unrestrained, supplies every living thing abundantly. She scortas every attampts to regard the mathematical cubic-inch programme.

Now, if we accept agitation as the mathematical cubic-inch programme.
